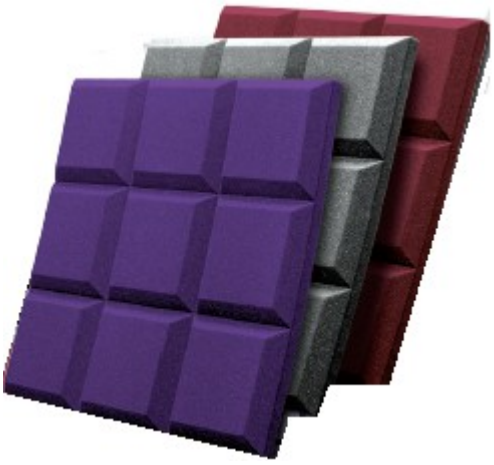
SonoFlat Grid

Product Data



SonoFlat™ Grid:

- New design based on original SonoFlat™ profile
- Overall NRC of 0.85
- Available in charcoal, purple and burgundy
- 2' wide X 2' long X 2" thick
- Easy installation using Foamtak™ Spray Adhesive or Tubetak™ Pro Liquid Adhesive.

Based on our popular SonoFlatT™ absorber, the Auralex® SonoFlat™ Grid™ measures 2'X2'X2" and is compromised of 9, 8"X8" beveled squares. Made from Auralex's proprietary and world-renowned Studiofoam, these panels offer the impressive mid and high frequency absorption the original SonoFlat™ panels are known for, as well as an elegant look that makes them a great addition to any studio, home theater or listening room.

The new SonoFlat™ Grid™ panel's unique design features nine, 8"X8" beveled squares, making them appropriate for a variety of professional and residential applications. The panels are available in three popular colors and are made from Auralex's long-lasting, melamine-free formula, which won't crumble with age.

The Auralex® SonoFlat™ Grid™ was developed out of our clients' desires to have a price-conscious Sudiofoam® solution with a completely unique, modern aesthetic appeal. This upscale product offers increased low-frequency absorption and a tasteful, seamless appearance.

Features:

- Wall mounted acoustical absorption panels
- Reduce unwanted acoustical reflections
- Tame chaotic reverberation
- Innovative aesthetic at home in professional and residential settings
- Sturdy melamine-free formula that won't crumble.
