

☑ Stain Repellent

Repellents are intended to prevent stains, dirt, and grime from penetrating the fabric. They create a protective shield that repels liquid, dirt and grime, thus giving you the time you need to clean the spills and prevent stains.

BLOCKaide™

- Our proprietary soil and stain repellent. It provides excellent repellency to oil and water and helps repel spills and makes clean up easier. Utilizes C6 chemistry.

☑ Crypton® Green

Crypton offers permanent stain, moisture, mildew, bacteria and odor-resistant protection by encapsulating each fiber while utilizing Green chemistry with ultra-low emissions. Crypton Green treated fabrics inhibit the growth of molds like *Aspergillus niger* and bacteria like *Staphylococcus aureus*. It also surpasses Greenguard's Indoor Air Quality and complies with BIFMA X7 emissions requirements and contributes to points for LEED-CI.

☑ Acrylic Backcoating

Acrylic backing is a formaldehyde-free coating that stiffens and strengthens fabric, locking the weave alignment in place. Once coated, dissimilar fabrics have comparable degrees of stretch, recovery, and stability. Acrylic back coating also prevents bleed through of adhesives, camouflages fabric transparency, and minimizes "darts" that occur when some light reflectant fabrics are manually pulled onto a panel surface. It is available in 3 different weights.

☐ Tyvek®

Tyvek is used on panels as an underlayment to add opacity and help prevent panel frames or other panel interior parts from showing through the fabric applied over it. It is a family of tough, durable spunbonded olefin sheet products. It is strong, lightweight, flexible, smooth, low-linting, opaque and resistant to water, chemicals, abrasion and aging.

Minimum Order Amount:

Acrylic Backcoating – 100 yards

Stain Repellent – 50 yards

Tyvek – 100 yards

Crypton – 50 yards
