About RSIC-1 EXT04 Series

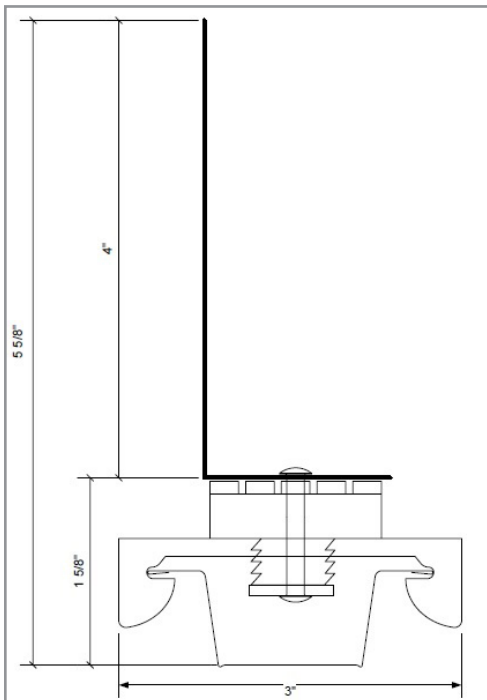

The RSIC-1 EXT04 Resilient Sound Isolation Clip is designed for use where additional drop for HVAC, Plumbing or Electrical Chases is needed. These clips give you the flexibility to drop a ceiling as much as 4" from its original height. It can also be used to level out uneven floor joists.

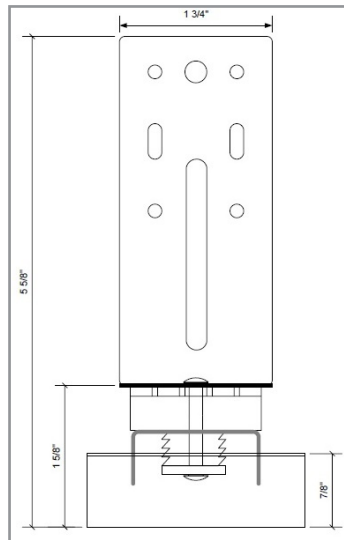

The RSIC-1 EXT04 Clip has proven very popular within Home Theater applications. It creates a dropped ceiling, allowing an open chase for the new wires, all while retaining superior acoustical performance.
